

Chapter 1 - Study Guide

Matching

Vocabulary

Short Answers

7 levels of classification system

You also need to know what the levels of the system are the most general to specific

5 classes of vertebrates and list some characteristics of each

4 phyla of invertebrates and list some characteristics of each

4 phyla of plants and list some characteristics of each

6 Kingdoms and list some characteristics of each

Steps in complete metamorphosis in a butterfly

Dichotomous Keys (there will be several questions about these)

Why does our classification system keep changing?
